Warehouse & Logistics vous présente son traditionnel panorama de l'offre belge d'engins de manutention. Le tableau synoptique compile les principales gammes de produits utilisés en handling.

Pour l'édition 2008 de notre dossier annuel Handling, nous avons pu compter sur le travail de compilation et de collecte d'information réalisé par notre correspondant Luc De Smet, spécialiste des chariots élévateurs de son état. À nouveau un regret : l'absence de réaction de

certain fournisseurs à nos multiples requêtes. Nous avons néanmoins tout mis en œuvre pour vous fournir l'information la plus up to date qui soit.

Bonne lecture.
